LIVENZA GROUP

Industry, energy and mobility

LIVENZA GROUP

Clean-energy distribution, packaging and plastics, automotive retail and industrial sourcing.

BANGLADESH & CANADA

Business profiles and partnership opportunities

CORPORATE PROFILE / OCTOBER 2026

Technology partner: LESSO Solar production facility

Group concern: Noor Autos showroom

Livenza at a glance

A business portfolio serving industrial customers, energy users and the automotive market, with published operations in Bangladesh and Canada.

Published group concerns	What partners can explore
Greenery Energy Solution Ltd.	Solar, storage, HVAC and EV charging distribution
Expo Accessories Ltd.	Garment accessories and packaging supply
Novelty Bangladesh Ltd.	Pharmaceutical packaging and industrial plastics
Noor Autos & Imports Ltd.	Automotive retail and local EV support
Greenery Import Export Ltd.	Canada-based energy and industrial product supply

Bangladesh

Dhaka commercial presence; Expo manufacturing in Gazipur.

Canada

Published Greenery contact: Surrey, British Columbia.

Skills collaboration

Associated platform: GIST, with DIU and Skill Jobs links.

Greenery Energy Solution Ltd.

Clean technology for operating businesses

A Bangladesh importer and distributor spanning solar generation, battery storage, HVAC and EV charging. LESSO Solar independently confirms its Bangladesh distribution relationship with Greenery.

Solar image from Greenery’s catalogue; illustrative context.

Distribution and industry membership

Equipment distribution with EPC and service partners. Listed in BSREA’s member directory; details on page 9.

SOURCES [2] [3] [20] [56] [57]

Products and service applications

Solar PV

Modules, inverters and balance-of-system items.

Energy storage

LFP batteries, racks and cabinet systems.

EV charging

AC/DC equipment and integration support.

Climate systems

VRF, cooling and ventilation products.

Also in the portfolio: garment labels, flexible packaging, cartons and automotive sales/service.

SOURCES [2] [8] [9] [11]

Partnerships with clear responsibilities

01	**Manufacturers**	Product appointment, technical files, warranty and training support.
02	**Distributors and installers**	Territory scope, stock, installation competence and service escalation.
03	**Corporate customers**	Site requirements, acceptance tests, maintenance and payment terms.
04	**Universities and training providers**	Curriculum roles, facility access, assessment and outcome tracking.
05	**Investors and joint ventures**	Diligence, governance, funding milestones and risk allocation.

Suggested engagement route: scope discussion, capability verification, pilot agreement, measured review and expansion.

SOURCES [3] [13]

Energy and infrastructure growth

Industrial rooftop solar

Need: control daytime energy cost.
Capability fit: Greenery product supply.
Partners: EPC firms and financiers.
Customers: factories and warehouses.
Revenue: equipment margin, installation coordination and O&M.
Steps: audit, design, quote, pilot, meter results.
Risks: roof suitability, finance, grid approval and performance.

Cooling and cold chain

Need: stable temperatures and lower operating cost.
Capability fit: HVAC/VRF range.
Partners: refrigeration engineers and controls specialists.
Customers: food logistics and industry.
Revenue: system supply and service contracts.
Steps: load study, pilot zone, validation, rollout.
Risks: product loss, power quality and specialist maintenance.

Solar with storage

Need: continuity for critical loads.
Capability fit: solar and ESS catalogue.
Partners: integrators and fire-safety specialists.
Customers: offices and production sites.
Revenue: equipment and monitoring services.
Steps: load profile, size system, test backup duty.
Risks: battery degradation, safety, sizing and warranty exclusions.

All concepts are proposals. Customer demand, financial viability, required permissions and delivery capacity need validation.

Mobility and industrial services

Fleet charging

Need: dependable charging at the depot.
Capability fit: Noor customer access and Greenery chargers.
Partners: fleet owners, electrical contractors and utilities.
Customers: corporate fleets.
Revenue: equipment, commissioning and maintenance.
Steps: duty-cycle study, site design, pilot chargers.
Risks: utilisation, connector compatibility and electrical capacity.

EV parts and diagnostics

Need: reliable maintenance and traceable replacement parts.
Capability fit: automotive service proposition.
Partners: authorised OEM channels and trained workshops.
Customers: vehicle owners and fleets.
Revenue: parts margin and diagnostic fees.
Steps: approve SKUs, train staff, stock critical items.
Risks: warranty conflicts, counterfeit parts and inventory ageing.

Industrial monitoring

Need: visibility into energy use and equipment faults.
Capability fit: technical training and energy relationships.
Partners: controls vendors and software integrators.
Customers: factories and buildings.
Revenue: commissioning and support subscription.
Steps: instrument a pilot, establish baseline, test alerts.
Risks: data security, interoperability and sensor reliability.

All concepts are proposals. Customer demand, financial viability, required permissions and delivery capacity need validation.

Manufacturing, skills and new channels

Lower-impact packaging

Need: material efficiency and buyer traceability.
Capability fit: Expo product portfolio.
Partners: material suppliers and test laboratories.
Customers: apparel exporters.
Revenue: packaging orders and design services.
Steps: review specs, sample, test, secure buyer approval.
Risks: material cost, quality variation and unsupported green claims.

Skills and workforce retail

Need: practical skills and convenient worker supplies.
Capability fit: GIST links and industrial relationships.
Partners: employers, educators and retailers.
Customers: learners and factory workers.
Revenue: course fees, sponsored cohorts and retail margin.
Steps: separate pilots with learner and worker feedback.
Risks: low uptake, weak outcomes and credit exposure.

Institutional supplies

Need: reliable sourcing for institutional procurement.
Capability fit: distribution experience only.
Partners: qualified medical suppliers and compliance specialists.
Customers: hospitals and institutions.
Revenue: B2B supply contracts.
Steps: select permitted products, qualify vendors, tender pilot.
Risks: product regulation, quality liability and payment delays.

All concepts are proposals. Customer demand, financial viability, required permissions and delivery capacity need validation.

A staged growth roadmap

01

SHORT TERM

0–6 months

Confirm entity data and brand assets. Build a verified project register. Select one energy and one skills pilot.

Gate: owners, budgets and acceptance measures agreed.

02

MEDIUM TERM

6–18 months

Expand pilots that meet customer and financial targets. Strengthen service coverage, spare parts and partner training.

Gate: repeat demand and dependable service performance.

03

LONG TERM

18–36 months

Evaluate local value addition, advanced training and international joint ventures. Stage R&D investment against demand.

Gate: proven economics, technical readiness and governance.

What the public record establishes

ENTITY	PUBLICLY EVIDENCED	NOT PUBLICLY VERIFIED
Livenza	Portfolio and executive references	Founding year, ownership, audited scale
Greenery BD / Canada	Products, published addresses, BD supplier links	Entity founding dates, Canada leadership and capacity
Expo	2005 origin; named leadership; factory address	Final LEED award; output and customer approvals
Noor Autos	Regional dealer; Uttara opening and leaders	Entity founding date; current dealer agreement scope
GIST	Origin narrative, programme and partner pages	Accreditation, completed R&D lab, placement results
LESSO / Solar / ZERO	Official portfolios, scale claims and Greenery links	Solar / ZERO current executive leadership

Manufacturer metrics describe the named manufacturer, never Livenza's own capacity. Proposed collaborations remain explicitly labelled proposals.

Expo Industrial Park

Industrial platform named by GIST

Published identity

GIST names Expo Industrial Park in Kanchpur and connects its proposed flagship R&D laboratory with Expo Accessories, a Livenza concern.

Planned research facility

The stated focus is research, prototype testing and industry–academia collaboration. The laboratory remains described as planned.

Location distinction

Kanchpur is the location in the GIST roadmap. Gazipur factory photographs elsewhere in this brochure are not presented as images of this park.

Corporate and brand details

Separate registration, current park operations, leadership, official logo, site photographs and direct contacts: Management confirmation required.

SOURCES [15] [19]

SOLAR APA

Public green-energy outreach initiative

Published programme

Skill Jobs publicly promotes the SOLAR APA campus ambassador programme, with a focus on green energy and leadership.

Relationship status

This supports the existence of a public initiative. The sources reviewed do not establish it as a separately incorporated Livenza subsidiary.

Programme details

Current eligibility, delivery calendar, programme ownership, participant outcomes and direct contacts require management confirmation.

Brand assets

An attributable official logo and authorized programme photographs were not established in the reviewed sources. Management confirmation required.
